

# Enhancing Learning Through Broad Dissemination of Research-Based Resources

Lucy Sanders  
NCWIT

# My Broader Impact Focus

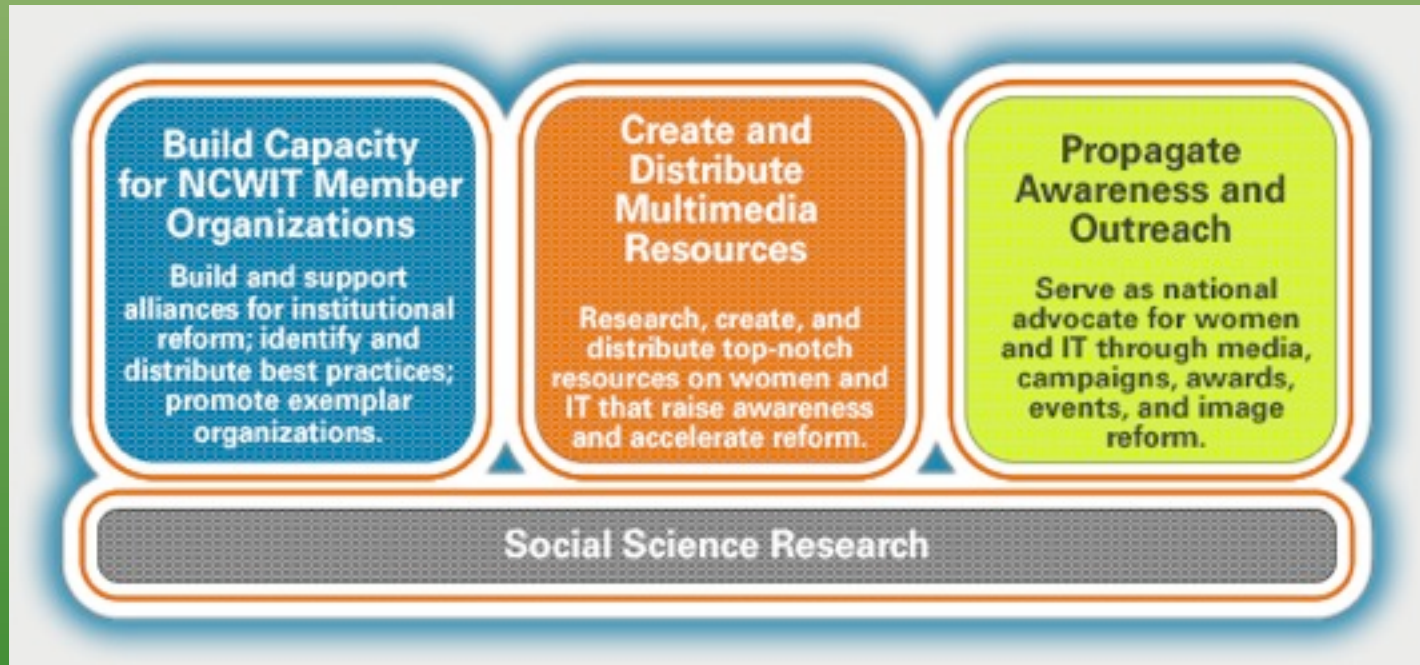

- NCWIT is working to broaden participation of girls and women in computing
- Why?
  - Women’s participation in computing is declining, broadly, and is quite low in key “innovation” roles
  - Advances in computing are foundational to almost all other scientific pursuits
  - Women represent critical untapped creativity which will fuel our nation’s innovation

# My Broader Impact Activities

*Mission - Significantly Increase Women's Meaningful Participation in IT*

## Boxes & Workbooks

## Practices & Talking Points

## Reports

Lucy Sanders  
NCWIT

# Broader Impact Activities help ...

- By providing evidence-based resources needed to fuel the reform efforts of change-agents across the country
- By building awareness
- By showcasing efforts of others
- By surfacing research gaps that need further attention

# A GOOD Activity is ...

- Resources that create awareness,
- Awareness that leads to growing organizational readiness,
- Organizational readiness that leads to action (with supporting resources/tools), and
- Positive quantifiable results (increased enrollments, degrees granted, retention, etc.)

# Join Us!

- Join an NCWIT Alliance
- Tell us about evidence-based practices in computing
- Put NCWIT resources to work and tell us what you think
