

# Intellectual Push & Pull: Broader Impact Through Curricular Infusions

Valerie Barr

Union College

# My Research

## *Creating a Campus-Wide Computation Initiative*

- CPATH funded project at Union and Lafayette
- Give proper foundation to those who are or should be using computation in teaching and research.
- Broader Impact category: Advance science while promoting teaching, training and learning

Valerie Barr  
Union College

# Original Broader Impact Statement

- Increase number of students with ability to develop scripts and programs in context of primary area of study.
- Broaden cohort studying computation to reflect diversity existing in other disciplines.
- Disseminate model and strategies for implementation

Valerie Barr  
Union College

# Intellectual Push and Pull

- Pull – infuse interesting themes into CS courses (change intro, intermediate, minors)
- Push – infuse computation into non-CS courses (change courses in other depts.)

Valerie Barr  
Union College

# Pull – Multiple Intro and Intermediate Courses

- Taming Big Data
- Robots Rule!
- Game Development
- Can Computers Think?
- Creative Computing
- Programming for Engineers
- Natural Lang. Proc.
- Modeling & Sim.
- Web Programming
- Bioinformatics
- CS of Computer Games
- Visualization

Valerie Barr  
Union College

# Pull – Minor programs involving CS

- Computer Science
  - Standard CS minor
- Computational Methods
  - 3 CS combined with any 3 other computationally oriented courses
- Digital Media
  - 3 CS and 3 Visual Arts

Valerie Barr  
Union College

# Pull – Students Come From....

- Old intro course
  - Bio
  - Engineering (computer, electrical, mechanical)
  - Econ
  - Math
  - Undecided science
- Now – The old places plus
  - Chem
  - Neuro
  - Arts
  - East Asian Studies
  - English
  - History
  - Physics
  - Psychology
  - Philosophy
  - Political Science
  - ..... and more....

Valerie Barr  
Union College

# Pull – Gender Breakdown

- Old introductory course
  - 17.7% female enrollment over 7-year period
- New course scheme
  - 21.5% female enrollment overall
  - 27.7% women in AI, media comp., computational sci.
- Note that some fields from which we draw have their own gender issues.

Valerie Barr  
Union College

# Push

- Faculty (non-CS) incorporate computation into their courses
  - through labs, lectures, homework, projects
  - Astronomy(2), biology(2), chemistry, civil engineering, classics, economics(3), electrical and computer engineering(2), film studies, mechanical engineering(2), physics, political science, psychology (neuroscience).

Valerie Barr  
Union College

# Push – Does it work?

Key outcomes:

1) faculty say it's “doable”!

2) students say

- enhanced understanding of course material
- increased interest in future activities that will involve computational methods

Valerie Barr  
Union College

# Impact – is it broad?

- Through August 2009
  - 13 faculty
  - 10 departments & programs
  - 16 courses modified
- Through August 2010
  - 18 faculty
  - 12 departments & programs
  - 22 courses modified

*Push* >11% of student body

*Push & Pull* >23% of student body.

And 96 high school students

Valerie Barr  
Union College

# Side Benefit for CS Dept.

- Seen as department that can and will work with students with hybrid interests.
- In 2009, over 50% of CS graduates did double or interdepartmental major with another discipline
  - arts, biology, classics, economics, math, philosophy, political science

Valerie Barr  
Union College

# Join Us!

- Workshops in January 2011 at Union & Lafayette
  - Should be attended by faculty pairs, one CS, one non-CS
  - Come with an infusion idea, leave with a solid plan to develop curricular infusion for AY 2011-2012
